Digital Confidence Releases Password Manager

TEL AVIV, ISRAEL (July 13, 2009) — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions, today announced the release of Sisma™ - an easy-to-use password manager that allows users to store and manage their passwords in a secure and convenient way.

Sisma™ keeps the user's accounts details and passwords in a secure database that is encrypted with strong 256-bit Advanced Encryption Standard (AES, Rijndael) cipher. It includes a strong random password generator which can generate alphanumeric or pronounceable passwords.

Sisma™ promotes password management best practices by warning the user when a weak password is chosen or when a password is reused across accounts. It allows the user to specify expiration time for passwords and reminds the user to change them when they expire. It employs advanced clipboard clearance mechanisms to minimize the risk of passwords left in the clipboard after the user has used them.

About Digital Confidence

Digital Confidence is the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions to individuals and organizations of all sizes, from small and medium business and law firms, to large-scale enterprises.

Digital Confidence best of breed products enables our customers to make their way in the digital world with confidence, and frees them from the worry of unintentional sensitive data leakage which can cause embarrassment with possible financial and legal implications.

Digital Confidence is a privately held company with corporate headquarters in Tel Aviv, Israel.
