Digital Confidence Enhances Password Manager

TEL AVIV, ISRAEL (September 24, 2009) — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions, today announced the release of new version of its password manager - Sisma™ 2.

The new version features improved user interface. Sisma™ 2 was released with an installer for easy deployment in Microsoft Windows® and as a ZIP package for use directly from USB flash drives.

Sisma™ keeps the user's accounts details and passwords in a secure database that is encrypted with strong 256-bit Advanced Encryption Standard (AES, Rijndael) cipher. It includes a strong random password generator which can generate alphanumeric or pronounceable passwords.

About Digital Confidence

Digital Confidence is the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions to individuals and organizations of all sizes, from small and medium business and law firms, to large-scale enterprises.

Digital Confidence's best-of-breed products enables its customers to make their way in the digital world with confidence, and frees them from the worry of unintentional sensitive data leakage which can cause embarrassment with possible financial and legal implications.

Digital Confidence is a privately held company with corporate headquarters in Tel Aviv, Israel.
