## **Russian Firm Deploys MailValve EX Server-Based Hidden Data Remover**

**TEL AVIV, ISRAEL (September 27, 2011)** — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data & metadata removal, and privacy software solutions, today announced that its server-based hidden data & metadata removal add-in for Microsoft Exchange Server has successfully been deployed for 300 users at a Moscow-based investment company.

MailValve EX™ has been selected by the Russian firm for automatically removing hidden data & metadata from the attachments of all the outgoing emails of its 300 users, according to a centrally set rules, thus enabling the firm to enforce an organization-wide hidden data removal policy to prevent accidental confidential and private data leakage, without the need of user intervention.

Powered by Digital Confidence DataDistiller™ Engine, MailValve EX™ is able to remove more than 50 types of hidden data from 20 file types, including Microsoft Office® documents (Word, Excel, PowerPoint), OpenOffice.org documents, PDF documents, and popular image and media file types such as JPEG, PNG, and SVG. MailValve EX™ can remove hidden data from files even if they are compressed within ZIP files. MailValve EX™ fits organizations of all sizes, from small and medium business and law firms, to large-scale enterprises.

### **About Digital Confidence**
