Company Deploys MailValve EX for 100 Users

TEL AVIV, ISRAEL (January 16, 2014) — Digital Confidence, the leading provider of hidden data removal, data leakage prevention (DLP), and metadata management software, today announced that its server-based hidden data & metadata removal add-in for Microsoft Exchange Server has successfully been deployed for 100 users by a company based in the Czech Republic.

MailValve EX™ has been selected by the company for automatically removing hidden data & metadata from the attachments of all outgoing emails of its 100 employees, according to a centrally set rules, thus enabling the company to enforce an organization-wide hidden data removal policy to prevent accidental confidential and private data leakage, without the need of user intervention.

Powered by Digital Confidence DataDistiller™ Engine, MailValve EX™ is able to remove more than 60 types of hidden data from 24 file types, including Microsoft Office® documents (Word, Excel, PowerPoint), OpenOffice™ documents, PDF documents, and popular image and media file types such as JPEG, PNG, and SVG. MailValve EX™ can remove hidden data from files even if they are compressed within ZIP files.

About Digital Confidence

Digital Confidence is the leading provider of hidden data removal, data leakage prevention (DLP), and metadata management software to individuals and organizations of all sizes, from small and medium businesses and law firms, to large-scale enterprises.

Since its foundation in 2009, Digital Confidence's desktop-based and server-based products has been deployed by more than 250,000 individuals and organizations.

Digital Confidence's best-of-breed products enables its customers to make their way in the digital world with confidence, and frees them from the worry of unintentional sensitive data leakage which can cause embarrassment with possible financial and legal implications.

Digital Confidence is a privately held company with corporate headquarters in Tel Aviv, Israel.
