Digital Confidence Announces Metadata Removal Add-in for Microsoft Exchange

TEL AVIV, ISRAEL (October 14, 2009) — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions, today announced MailValve EX™, a hidden data & metadata removal add-in for Microsoft Exchange 2007.

MailValve EX™ seamlessly integrates with Microsoft Exchange 2007 and removes hidden data from the attachments of each and every email sent from the organization according to a centrally set rules, thus enabling organizations to enforce an organization-wide hidden data removal policy to prevent accidental confidential and private data leakage, without the need of user intervention. MailValve EX™ fits organizations of all sizes, from small and medium business and law firms, to large-scale enterprises.

Powered by Digital Confidence DataDistiller™ Engine, MailValve EX™ is able to remove 39 types of hidden data from 18 file types, including Microsoft Office® documents (Word, Excel, PowerPoint), OpenOffice.org / StarOffice™ documents, PDF documents, and popular image and media file types such as JPEG, PNG, and SVG. MailValve EX™ is able to remove hidden data from files even if they are compressed within ZIP files.
