

Digital Confidence Adds BWF Support to its Metadata Editor

TEL AVIV, ISRAEL (July 6, 2010) — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data & metadata removal, and privacy software solutions, today announced the addition of BWF support to its multi-format metadata explorer - MetadataFox[™].

The new version of MetadataFox[™] is able to extract Broadcast Audio Extension (Bext) metadata from Broadcast Wave Format (BWF) files, as well as to extract XMP from JPEG 2000, MP4, and F4V files.

MetadataFox[™] is a powerful tool to explore files by their metadata. MetadataFox[™] can extract metadata from Microsoft Office® documents (Word, Excel®, and PowerPoint®), OpenOffice.org documents, JPEG, JPEG 2000, AVI, MP4, F4V, WAVE, PNG, and XMP files.

About Digital Confidence

Digital Confidence is the leading provider of data leakage prevention (DLP), hidden data & metadata removal, and privacy software solutions to individuals and organizations of all sizes, from small and medium businesses and law firms, to large-scale enterprises.

Digital Confidence's best-of-breed products enables its customers to make their way in the digital world with confidence, and frees them from the worry of unintentional sensitive data leakage which can cause embarrassment with possible financial and legal implications.

Digital Confidence is a privately held company with corporate headquarters in Tel Aviv, Israel.
